This subject as defined in the resolutions respective duties. under which the Convention was called, at a meet-Your committee believe that this great en- prise be respectfully requested to copy the same terprise will subserve the interests of a large popuation of North Carolina which heretofore have been denied the advantages of Railroads-that it will be the most direct line of communication to connect the mierior and western region of North Carolina with seaboard, and that it promises ultimate connecons with the Mississippi and the Ohio, which in the estimate of its advantages, give to it a national

haracter. This enterprise, however, commends itof to our special favor that it is eminently, and exclusively a North Carolina work. It proposes its commencement at our most flourishing commercial seaport, and its course bisects the pine forests of Coambus Bladen and Robeson-the cotton fields of h chmond, Anson and Mecklenburg-the wheat and Can lands in the counties of the Catawba and the Taikin, and the rich pastures of Ashe, Watauga, Yancey, embracing in its course, three hundred and fifty miles of our territory, of great variety of and climate and production; and accommodalog four hundred thousand of our citizens. It binds ogether sections of our State which have heretofore een divided by the interest of trade and the necessihes of their geographical position. The combination of these sections by the hands of a common brotherhood of interest and affection, will achieve for the State an increased energy in her public character and unity in her councils, the moral effect of which is incalculable, while the combination of these vations productions and the great resources, agricultural mechanical and mineral, which the road itself will develope, on one of our own commercial towns, will give to it a prosperity and importance of the highest value to the State. The proposed enterprise

ammends itself to our favor, in that it does not ineffere with works of improvement already constructand in which the State has involved her means, as no section of the State on the line of the Road he accommodated by the great Railroad which adividual enterprise and public liberality has confructed from Charlotte to Goldsboro'. Four-fifths the territory over which it will pass has ever and its most convenient markets in the State of South Carolina and will continue, in the opinion of our committee, to do so, unless this Railroad shall

completion with joy, and propose to unite their commercial destiny with ours.

Your Committee believe that this great work is entirely practicable, and at a cost greatly below the expenditure usually incurred for works of equal magnitude. Its whole length in North Carolina will probably be 300 miles. Of this extent 200 miles others, in the name of the mountain people to come | will afford facilities of construction, from the character of its surface-from the abundance and cheapness of its timber-which will reduce its cost greatly below the average of railroads. As to the other portion, your committee are informed that it affords the easiest access to our mountains, and the best pass through them, which are to be found in our State. It is not to be denied, however, that a work of this extent will involve a large expenditure of money, and while the prize is of inestimable value. our contributions and exertions must bear to it a corresponding proportion. Your committee rejoice to see in our cherished State an awakened spirit on the great subject of internal improvement, and from the east and the west-from the mountains to the ocean -throughout all our borders-the utterance of public sentiment is loud and unanimous in favor of such public works, as the interests of trade and the developement of her resources demand. A people long in apathy, as to their social condition, are awakening with renewed energy and bounding into new life. It is the harbinger of a new era to our beloved State-the rising beam of a splendid and unsurpassed prosperity. Your committee feel, therefore. that the friends of this great North Carolina work-North Carolina in its length and its breadth, in its beginning at the sea to its terminus in the summits of her own mountains-cannot be but favorably heard in its appeal for public aid, while they feel assured, from the enthusiastic demonstrations of this convention of its friends, that private enterprise will not be wanting to perform its part of the great work.

Your committee would therefore recommend the accompanying resolutions for the adoption of the
